

Bayram KAYA

Software Engineering (Jr. Front End Developer)

I am a Software Engineering graduate from Malatya Turgut Özal University. I am progressing on the path to becoming a Full Stack Web Developer, with a primary focus on Front-End development. My strong interest in modern web technologies and frameworks, combined with my commitment to continuous learning and successful project delivery, motivates me to stand out in the technology industry.

Education

2016-2020 Raman High School

2020-2024 Malatya Turgut Ozal University Software Engineering (Bachelor's Degree)

Experience

17.07.2022/11.08.2022 Nano Tanıtım - Web Design Mandatory Engineering Internship

01.06.2023/09.10.2023 Ordulu Teknoloji A.Ş Voluntary and Mandatoy Engineering Internship

I worked as a Front-End Developer at Ordulu Teknoloji, where I continuously improved my skills by developing projects using JavaScript, React.js, Next.js, and Angular. With a strong focus on user experience, I optimized web applications and contributed to building efficient and user-friendly interfaces. During this period, I also strengthened my teamwork and communication skills. This experience encouraged me to keep up with innovations in the technology industry and played an important role in advancing toward my career goals. After completing my internship, I received a job offer; however, I was unable to accept it due to incompatibility between academic commitments and company conditions.

20.10.2023/22.07.2024 Grizzle Technology Software Engineer

I worked as a Front-End Developer at Grizzle Technology for 9 months, contributing to the development of the PAM product for an innovative start-up company. During this period, I built visually appealing and highly functional user interfaces using modern web technologies. I developed dynamic and user-friendly themes with HTML, CSS, Bootstrap, and Tailwind, and created interactive, responsive web components using JavaScript.

I developed complex, high-performance web applications using React.js and Next.js, and implemented dynamic routing along with data encryption to ensure secure data transfer and an optimized user experience. By using SCSS, I improved code readability, maintainability, and styling efficiency. I also built modern and consistent UI components using Material UI, ensuring visual consistency across applications.

In addition, I managed backend integrations, optimizing data fetching and processing workflows. This experience provided me with in-depth knowledge of user-centered design, performance optimization, and secure data communication.

07.07.2025/15.08.2025 Infina Volunteer Software Engineering Internship

In the Fintra B2B trade application, developed using React, Next.js, and TypeScript, I took an active role in an end-to-end development process aligned with corporate finance and stock market scenarios. On the backend side, I designed and developed RESTful APIs based on application requirements, while on the frontend I built an Axios-based service architecture to ensure centralized, maintainable, and scalable API integrations. I implemented a component-based and scalable architecture, developing reusable UI components using parent-child data flow. I managed buy-sell (trade) and fund transfer (virman) workflows in a consistent and high-performance manner using Redux for state management. In addition, I integrated i18n to provide multi-language (translation) support and implemented a dark theme to enhance usability for long-term and corporate use cases. Through this project, I gained extensive experience in scalability, performance, and user-experience-focused modern front-end development for B2B financial applications.

Skills

<u>Programming Languages</u>	<u>Web</u>	<u>Database</u>	<u>Architecture and Methodology</u>
<ul style="list-style-type: none">• Javascript• Java• Python• SpringBoot	<ul style="list-style-type: none">• React.js• Next.js• Angular• Vue.js• WordPress• HTML• CSS,SCSS,LESS	<ul style="list-style-type: none">• MongoDB• MySQL• PostgreSQL	<ul style="list-style-type: none">• OOP• N-layer architecture• MVC• Web Services API• Restful API• Agile

Certificates

BTK Academy

Intoruduction to Java / April 2023
(Certificate No: OKMhq4MkGO)

BTK Academy

Python / April 2023 (Certificate No: Nowf2Jg1M)

BTK Academy

HTML and CSS/ April 2023
(Certificate No: yjahJWM21)

Turkcell Future Writers

Asp.Net Core MVC 101 / May 2023

BTK Academy

Angular, Javascript, Typescript / June 2023
(Certificate No: IK1h7PEMD7)

Infina Software

Internship Completion Certificate / August 2025

Foreign Languages

English
